No additional hub required

Schedule light on/off by sunrise/sunset or by time/day

Wi-fi internet Connection required

Dim light up or down
Change CCT from 2700K-6000K

Manage light from your phone with free smart life App or Alexa/Google devices

Compatible with Amazon and Google home. voice control

Control with your voice

Compatible with Alexa and Google Home.
 Turn on/off the light, adjust the color or brightness via your voice
 Alexa, turn on the kitchen light
 Ok Google, dim bedroom light

Control the Wi-Fi LED Light no matter where you are

- Turn it on/off without leaving your bed or before going back home.
- Control the light on at night and let the light off during the day when you're away from your house on vacation or you are gone overnight which improve home security and save energy.

Create Smart Lamp Group Easily

You can create groups on the APP to manage two or more smart lights. Synchronous control will be realized through smart light group. Such as, gradually dim them or change the color of them all simultaneously.
 Turn on/off the kitchen, bedroom, living room and dining room light at the same time.

Colorful Lighting

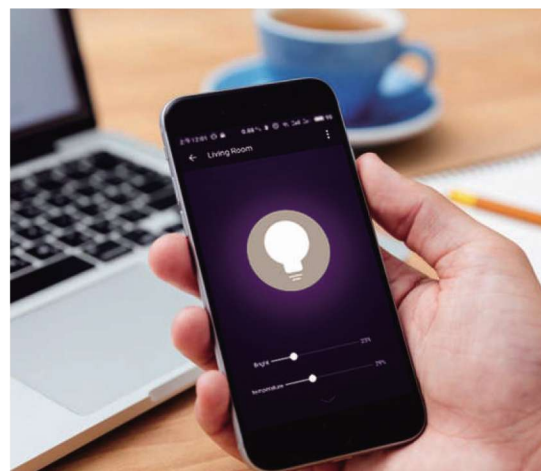

The color temperature of the light is from 2700K to 6000K.

Support Timing

The sleep timer will automatically turn off the light after the preset time has elapsed per your settings.

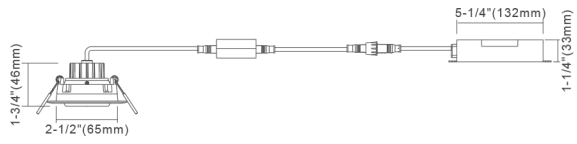

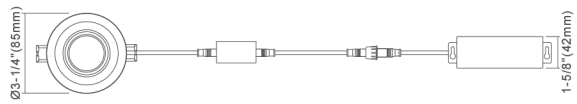

- You can set the bedtime for your children through the way of light off.
- You do not have to remember to turn off the light before you go to sleep.
- You also can set a wake-up time with your favorite color.

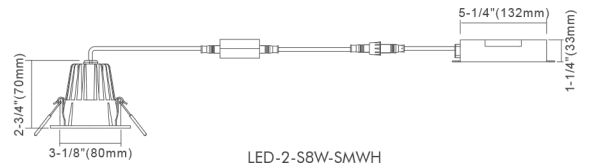

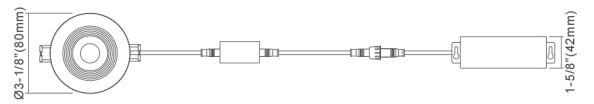

Installation Free Diming

By just swiping your thumb
